	Industry members as well as others	The customer should just click the alert message to enhance the further step to stop the fire. Proper network connection and available devices are needed.	The customer used to call for the emergency number 101 to call the fire service team to stop the fire at that time of reporting many products in the industry gets damaged and many lives were death. Now with the use of our product the industry can sense the fire explosion and stop at the initial stage itself. So, it is quite much more easy.
