

## TO CREATE AND CONFIGURE IBM-CLOUD SERVICES

Team ID	PNT2022TMID53674
Project Name	Project – Industry Specific Intelligent Fire Management system

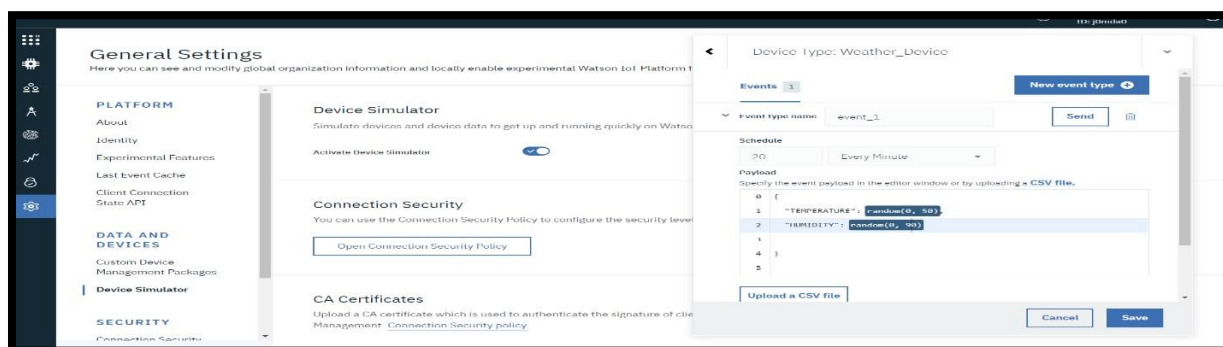

1) Open [cloud.ibm.com](https://cloud.ibm.com) and sign into specified cloud account and ADD DEVICE

2) Provide required credentials to configure the device.

3) Enable Device Simulator to generate a simple code.

## TO CREATE AND CONFIGURE IBM-CLOUD SERVICES

4) Check the output in the Recent Events.

The screenshot shows the IBM Cloud IoT Platform console. At the top, there's a search bar and a 'Device Simulator' toggle. Below is a table of devices. The first device, ID 1234, is 'Disconnected' and is a 'Weather\_Device'. Below the device list, there's a tabbed interface with 'Identity', 'Device Information', 'Recent Events', 'State', and 'Logs'. The 'Recent Events' tab is active, showing a list of events. Below the events, it says '1 Simulation running'.

Event	Value	Format	Last Received
event_1	{"TEMPERATURE":43,"HUMIDITY":14}	json	a few seconds ago
event_1	{"TEMPERATURE":12,"HUMIDITY":9}	json	a few seconds ago
event_1	{"TEMPERATURE":46,"HUMIDITY":39}	json	a few seconds ago
event_1	{"TEMPERATURE":1,"HUMIDITY":82}	json	a few seconds ago
event_1	{"TEMPERATURE":48,"HUMIDITY":88}	json	a few seconds ago

5) The generated function can also be depicted in a graphical format using Boards.
